

## Gospel

### I. First the Hills

Christ is walking in the hills, a number of Church formations, even long buildings of Churches, where Christ is holding sermons.

### II. Down the Hills

A long walk towards poorer people.

### III. Jaffa

Christ is wandering in Jaffa.

## Modern Context

Christians, people participating in religion are in the hills of Damascus, and following small brick structures and medieval towers and talking about phenomenology. Is lived experience finally capturing the medieval period well – this is Paul’s medieval towers. He grasps this format as a Cross, and tearing it down – the passion, which then means as we are in modern European psalm – free. Even choirs sing.

### II. Sassi

That in fact the bridge is then a complex bridge of remaining wild Churches which is where the sermons become liberating. We understand healthcare to be the process of a doctor, such fundamentals only. The science of leaves and its scientific structure, guides us.

## Translation

Only in nature, do we find the worst, it is when we are philosophy of nature but in Christ.
